Telmec

RADIO FREQUENCY FILTERING SYSTEMS

SINCE 1975 - MADE IN ITALY

COMPANY PROFILE

TELMEC was founded in Florence in 1975 by Gino Borghesi as a company operating in the high precision mechanical and electromechanical sector.

Its main mission since then has been the design of filtering and combining products for radio signals in the different communication sites.

The company was taken over by its employees in 2006. TELMEC therefore develops and manufactures autonomously systems and components in the radio frequency field which are needed to operate an interference free service from frequency crowded radio sites. Our know how is the result of a forty year long research and development activity in the field of Ground to Air Radio Communications in the civilian market of the components used.

TELMEC is certified according to the ISO 9001:2008 Quality Control standard.

TELMEC focus is on some specific areas of activity:

- Development of the most cost effective radio frequency system solution based on customer's requirements;
- Achievement of optimum electrical performance and thermal stability through a careful material selection and thoughtful construction;
- Standard high quality production of filters, combiners, couplers for the radio site. We constantly make use of customer's feedback from the field to improve our quality level;
- Utilization of state of art electronics for the control of the automatic tuning of the filters;
- Capability of developing customized solutions;
- Punctual delivery of products which are tuned in factory according to the configuration supplied by the customer.

The strength of our organization is therefore based on the quality of our products and our constant support to the customer. The quality concept comes easy to our company as our high standards for the manufacturing process must include stringent control of the dimensions and surface finish of the components used.

Band Pass Filters VHF

080 rectangular cavity

Double cavity window coupled band pass filter in the 112-157 VHF range can be allocated in one half 2 unit 19" cabinet. Frequency tuning and window coupling are manually regulated through mechanical knobs. The adjustable window allows for different selectivity settings.

Electrical Specifications

Frequency band:	112 - 157 MHz
Impedance:	50 Ω
Max Power:	100W CW
Insertion loss:	Adjustable, window coupling, rotating loops

Mechanical Specifications

Connector Type:	N Female
Dimensions:	½ 19" rack, 2HU, depth 675 mm
Operating temp.:	-10°C to +55°C
Tuning method:	Rotary knobs, telescopic movement

Band Pass Filters	Channels	Cabinet 2HU	Attenuation

Band Pass Filters VHF

085 rectangular cavity

Double cavity window coupled band pass filter the VHF range can be allocated in one half 2 unit 19" cabinet. Frequency tuning is manually regulated through mechanical knobs.

Electrical Specifications

Frequency band:	112 - 156 MHz
Impedance:	50 Ω
Max Power:	50W CW
Insertion loss:	2 dB

Mechanical Specifications

Connector Type:	N Female
Dimensions:	1/2 19" rack, 2HU, depth 560 mm
Operating temp.:	-10°C to +55°C
Tuning method:	Rotary knobs, telescopic movement

Band Reject Filter VHF

210 square cavity

One or two band reject filters in the VHF range can be allocated in one 5 unit 19" cabinet. Frequency tuning and attenuation can be regulated through adjustable mechanical knobs.

Electrical Specifications

Frequency band:	118 - 144 MHz
Impedance:	50 Ω
Max Power:	100W CW
Insertion loss:	≤ 1.5 dB

Mechanical Specifications

Connector Type:	N Female
Dimensions:	19" rack, 5HU, depth 670 mm
Operating temp.:	-10°C to +55°C
Tuning method:	Rotary knob, telescopic movement

Notch Filters VHF

100 round cavity hybrid coupled

The Notch filter unit is composed of two round 100 cavities in a 4HU 19" cabinet. Frequency tuning and attenuation can be regulated through adjustable mechanical knobs.

Electrical Specifications

Frequency band:	118 - 137 MHz
Impedance:	50 Ω
Max Power:	100W CW
Insertion loss:	From 1 to 3 dB

Mechanical Specifications

Connector Type:	N Female
Dimensions:	19" rack, 4HU, depth 684 mm
Operating temp.:	-10°C to +55°C
Tuning method:	Rotary knob, non telescopic movement

MCP100-U/4

Combiners UHF

STAR 120 single cavity

Combiners allow several radio channels to operate at one site using a common antenna. The MCPS 120 U/2 star combiner is composed by 120 mm cavities and a star connection which combines two channels in the UHF range. The input and output loops can be adjusted for the optimum combination of selectivity and insertion loss.

Electrical Specifications

Frequency band:	225 - 400 MHz
Impedance:	50 Ω
Max Power:	100W CW
Insertion loss:	Adjustable 1 ÷ 3 dB

Mechanical Specifications

Connector Type:	N Female
Dimensions:	19" rack, 3 HU
Operating temp.:	-10°C to +55°C
Tuning method:	Rotary knob, telescopic movement

Combiners	Channels	Cabinet 3HU	Total height HU	Attenuation
MCPS120-U/2 F06UR120M2SSxxxx	2	1	3 - depth 560 mm	> 13 dB \pm 0.4% at 312 MHz

MCPS120-U/2

Combiners UHF

STAR 210 single cavity

Combiners allow several radio channels to operate at one site using a common antenna. The MCPS 210 U/2 star combiner is composed by two 210 mm cavities and a star connection which combines two channels in the UHF range. The input and output loops can be adjusted for the optimum combination of selectivity and insertion loss.

Electrical Specifications

Frequency band:	225 - 400 MHz
Impedance:	50 Ω
Max Power:	200W CW
Insertion loss:	Adjustable 1 ÷ 3 dB

Mechanical Specifications

Connector Type:	N Female
Dimensions:	19" rack, 5HU, depth 600 mm
Operating temp.:	-10°C to +55°C
Tuning method:	Rotary knob, telescopic movement

Combiners	Channels	Cabinet 5HU	Total height HU	Attenuation

MCPS210-U/2-2

DOUBLE BRIDGE 120 cavity

Combiners allow several radio channels to operate at one site using a common antenna. The MCPD 120 U double bridge combiners guarantee isolation between channels with respect to manifold or starpoint combiners. They are composed by two 120mm VHF cavities and two hybrid devices. Expansion of channels is done easily in the field without need of cavity retuning. Each channel is allocated in a single 3 unit 19" cabinet. Up to 8 channels in the UHF range can be installed in a 19" standard rack.

Electrical Specifications

Frequency band:	250 - 400 MHz
Between channels isolation:	50 Ω
Input Power:	100W CW
Insertion loss:	Adjustable 1 ÷ 3.5 dB

Mechanical Specifications

Connector Type:	N Female
Dimensions:	19" rack, 3HU, depth 560 mm
Operating temp.:	-10°C to +55°C
Tuning method:	Rotary knob, telescopic movement

Combiners	Channels	Cabinet 3HU	Attenuation
MCPD120-U#	1 ÷ 8	1 ÷ 8	19dB \pm 1% f_0

MCPD120-U/2
F06UR120M2DSxxxx

DOUBLE BRIDGE 120 cavity high selectivity

Combiners allow several radio channels to operate at one site using a common antenna. The MCPD 120 U high selectivity double bridge combiners guarantee higher selectivity and isolation between channels. Each channel is composed by three 120 mm UHF cavities and two hybrid devices. Expansion of channels is done easily in the field without need of cavity retuning. Up to 4 channels in the UHF range can be installed in 12 units, 19" standard rack.

Electrical Specifications

Frequency band:	225 - 400 MHz
Between channels isolation:	>50 dB @ +/-1% Fo
Input Power:	100W CW
Insertion loss:	Adjustable 1 ÷ 3.5 dB

Mechanical Specifications

Connector Type:	N Female or 7/16
Dimensions for each channel:	19" rack, 3HU, depth 560 mm
Operating temp.:	-10°C to +55°C
Tuning method:	Rotary knob, telescopic movement

Combiners	Channels	Cabinet 3HU	Attenuation
MCPD120-U#	2 ÷ 4	2 ÷ 4	>40dB @ ±1% f ₀

Combiners UHF

280 cavity

Combiners allow several radio channels to operate at one site using a common antenna. The MCPD 280 U double bridge combiner guarantees isolation between channels with respect to manifold or starpoint combiners. It is composed by two 280mm UHF cavities and two hybrid devices. Expansion of channels is done easily in the field without need of instrumentation or filter retuning. Each channel is allocated in a single 5 unit cabinet. Up to 8 channels can be installed in a 42 units, 25" standard rack.

Electrical Specifications

Frequency band:	225 - 400 MHz
Impedance:	50 Ω
Input Power:	100W CW
Insertion loss:	Adjustable 1 ÷ 3.5 dB

Mechanical Specifications

Connector Type:	N Female or 7/16
Dimensions for each channel:	25" rack, 5HU, depth 600 mm
Operating temp.:	-10°C to +55°C
Tuning method:	Rotary knob, telescopic movement

Combiners	Channels	Cabinet 5HU	Attenuation
